Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) drawn to compounds, process of making and methods of use wherein X is a 4-5 membered ring, R1 and R2 is non-het substituted.

Group II, claim(s) drawn to compounds, process of making and methods of use wherein X is a 6-7 membered ring, R1 and R2 is non-het substituted.

Group III, claim(s) drawn to compounds, process of making and methods of use wherein X is an 8-10 membered ring, R1 and R2 is non-het substituted.

Group IV, claim(s) drawn to compounds, process of making and methods of use wherein X is a 4-10 membered ring, R1 and R2 is het-S substituted.

Group V, claim(s) drawn to compounds, process of making and methods of use wherein X is a 4-10 membered ring, R1 and R2 is het-O substituted.

Group VI, claim(s) drawn to compounds, process of making and methods of use wherein X is a 4-10 membered ring, R1 and R2 is het-N substituted.

The inventions listed as Groups I-VI do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

They do not possess a **common core which is a significant part of the final compound** nor is said common core **novel over the prior art** (see MPEP 1850 D. "Markush Practice"), hence they do not meet the criteria for unity of invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
